Strategy

Our brand strategy should be an honest reflection of who we are as a company, and built on the principles that will guide our decisions going forward.

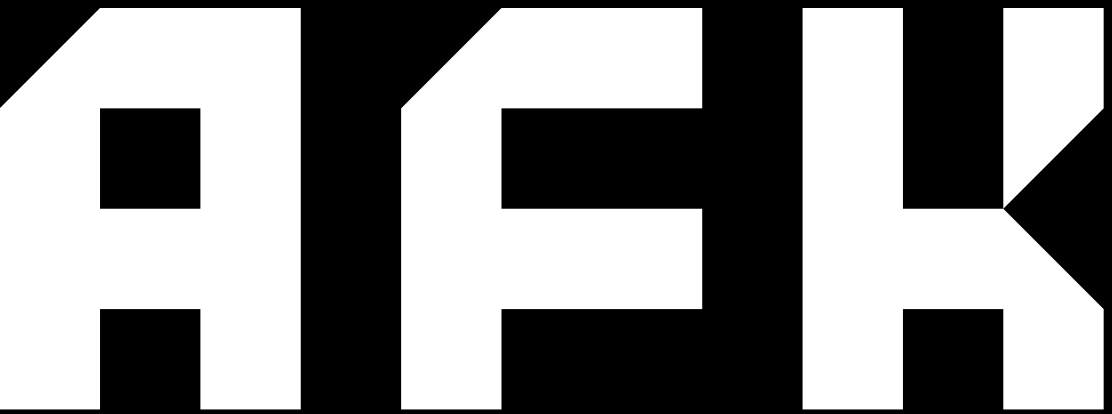

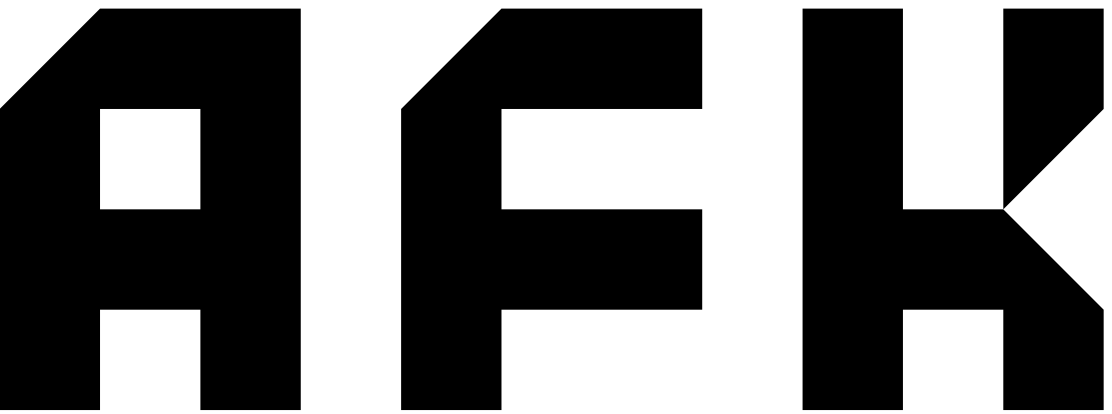

A sound foundation grounded in truth allows for clear thinking about how to improve or change something if necessary so you can meet new goals with ease.

Our actions have the power to change people's feelings about us. As such, our brand should be protected and cherished so that all at **AFK** Group provides a positive experience for our customers.

Who are we?	Remarkable individuals, passionately devoted to professionalise the connection and community
What do we do?	Unlocking access to passionate driven people, guiding them to be at their best and grow
How do we do it?	By offering effortless commitments to elevate their game, whether it be boldly or discreetly through knowledge
Why do we do it?	To create the agency where the ambitious belong and can live life in the present, forging a lasting legacy

Logo & Symbol

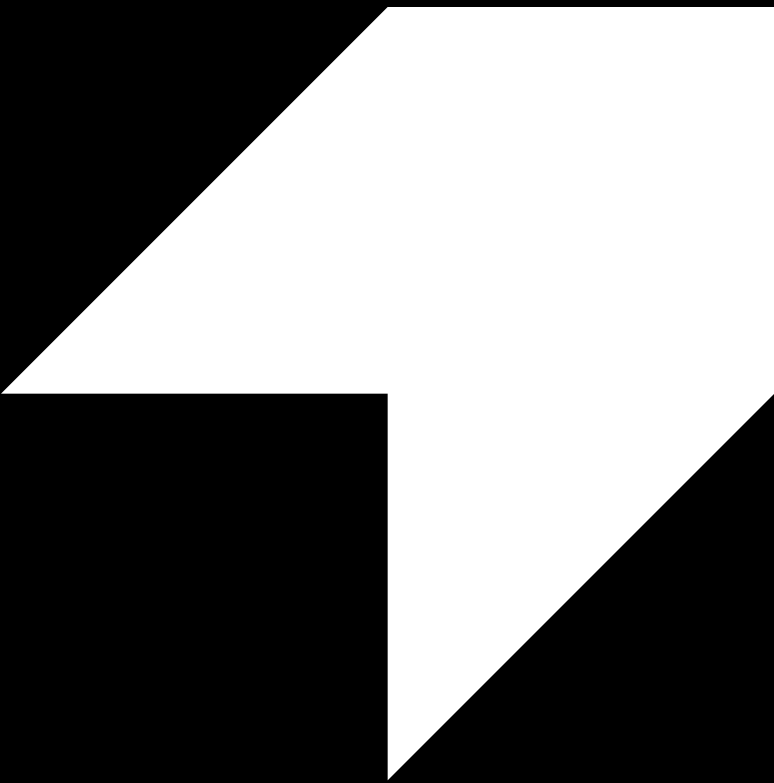

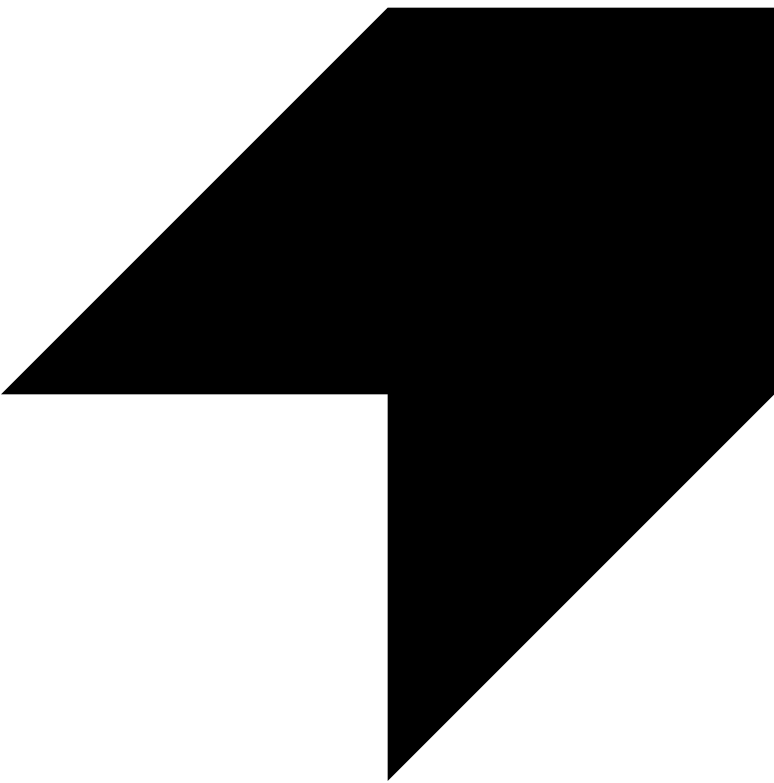

The AFK logo is only available in black & white. Always use the logo files provided and do not re-create.

Our Symbol

The AFK symbol is only available in black & white and should always be placed in a corner. In instances where the logo and symbol are featured, the symbol should always be exactly 50% of the logo height. When only the symbol is featured, it can be any size.

Always use the files provided and do not re-create.

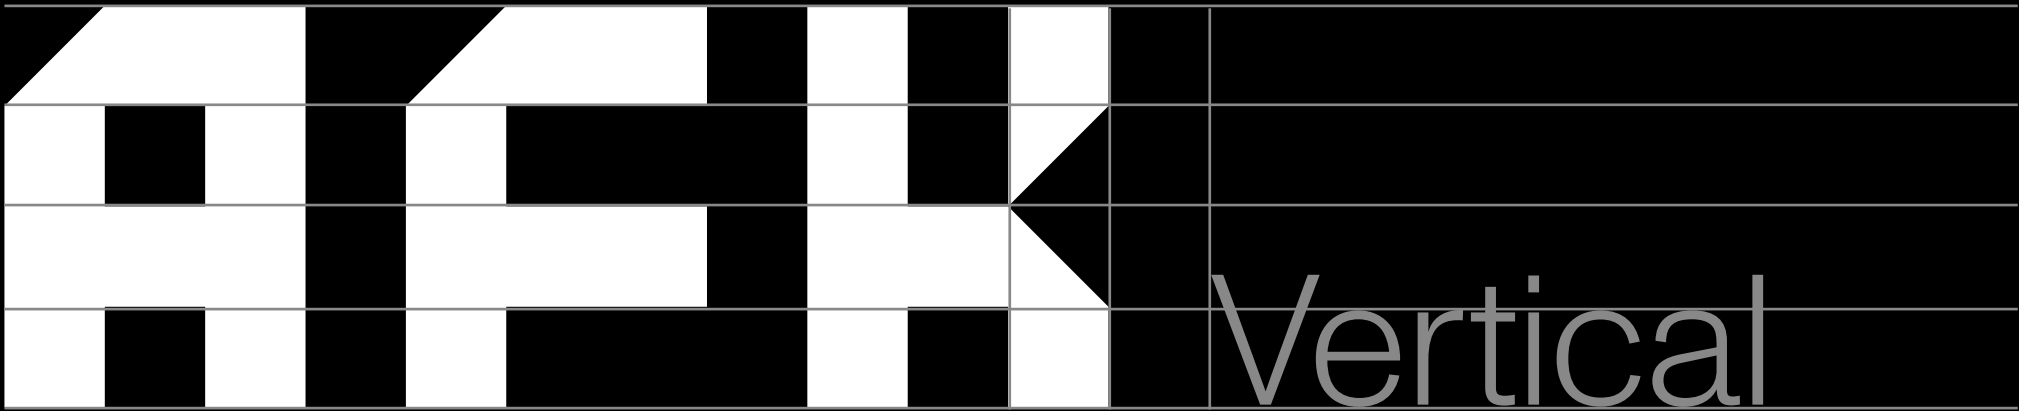

Our Verticals

In order to create any new AFK vertical logos, AFK Monument Grotesk Light should be used and aligned to the right of the logo, exactly one grid square apart. The x-height of the lowercase letters should also align to the first grid line created by the AFK logo size.

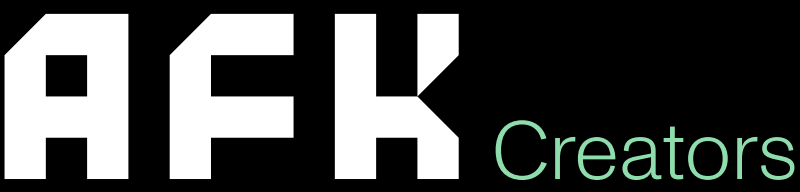

AFK's brand architecture is evolving, however there are currently three main AFK verticals; Creators, Pros & Digital.

Each vertical is also linked to one of our brand colours. For instance, when any collateral produced relates to our Pros vertical, or any Pro talent, accents of AFK Purple should be included.

Clear Space & Minimum Size

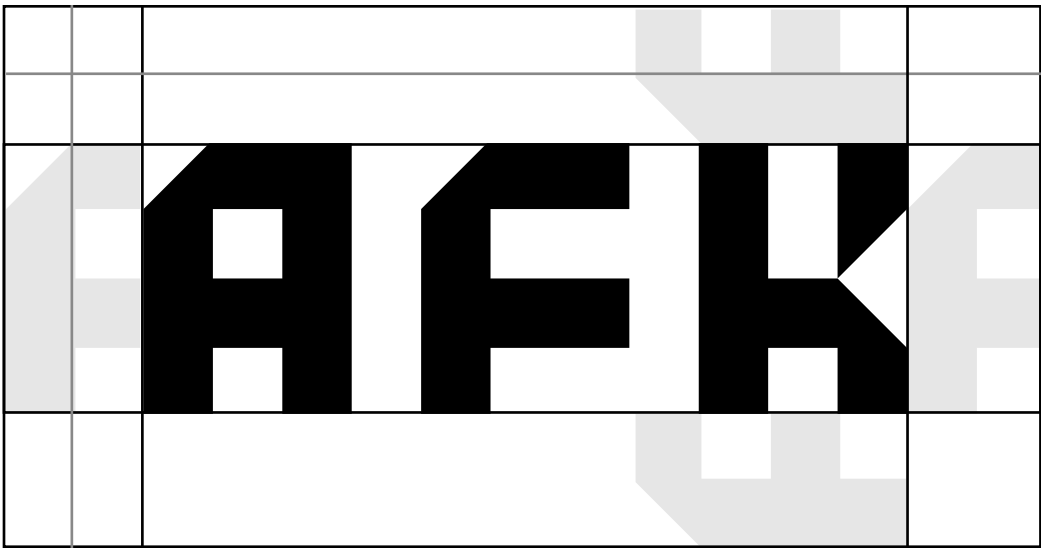

To ensure the AFK logo and symbol have maximum impact across all applications, an area of clear space should always surround them.

Our grid system should be used to calculate the clear space surrounding each.

To allow flexibility of use, the logo and symbol can be used at large and small sizes. Please note minimum sizes are based on the logo & symbol widths.

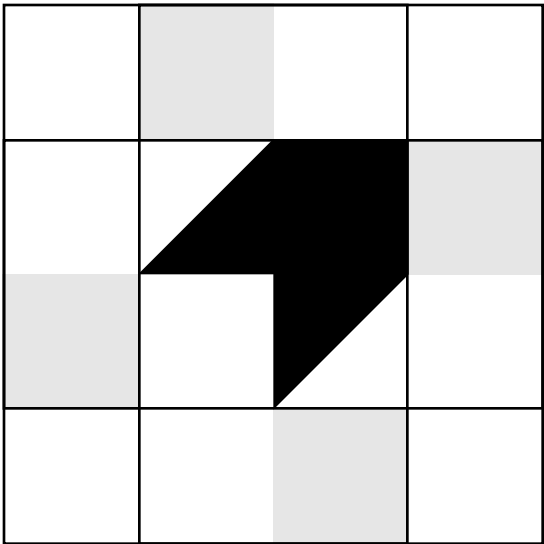

Minimum sizing for the logo is 85px wide for digital, or approximately 30mm for print applications. Minimum sizing for the symbol is 40px wide for digital, or approximately 10mm for print applications.

Logo Clear Space & Minimum Size

85px / 30mm wide

Symbol Clear Space & Minimum Size

40px or 10mm wide

These rules should be followed in order to ensure the logo is always recognisable and legible across all applications – see examples on how not to use the logo.

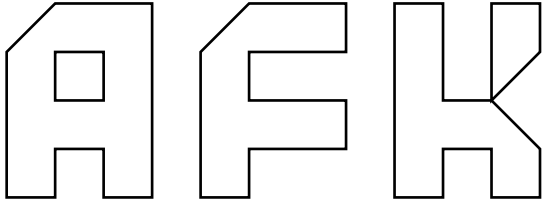

Do not use brand colours within the logo

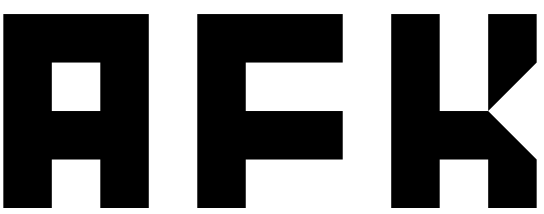

Do not distort the logo in any way

Do not outline the logo

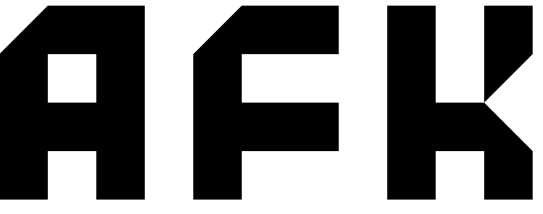

Do not alter the letter shapes in any way

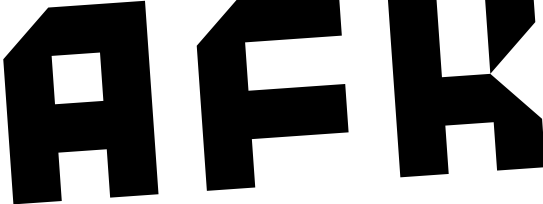

Do not use drop shadows or any other effect

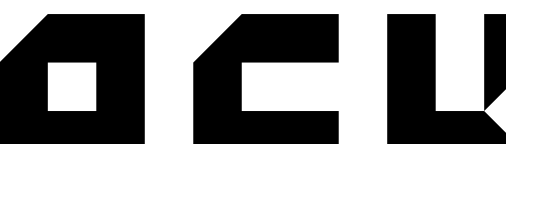

Do not add any elements or underline the logo

Do not skew or rotate the logo

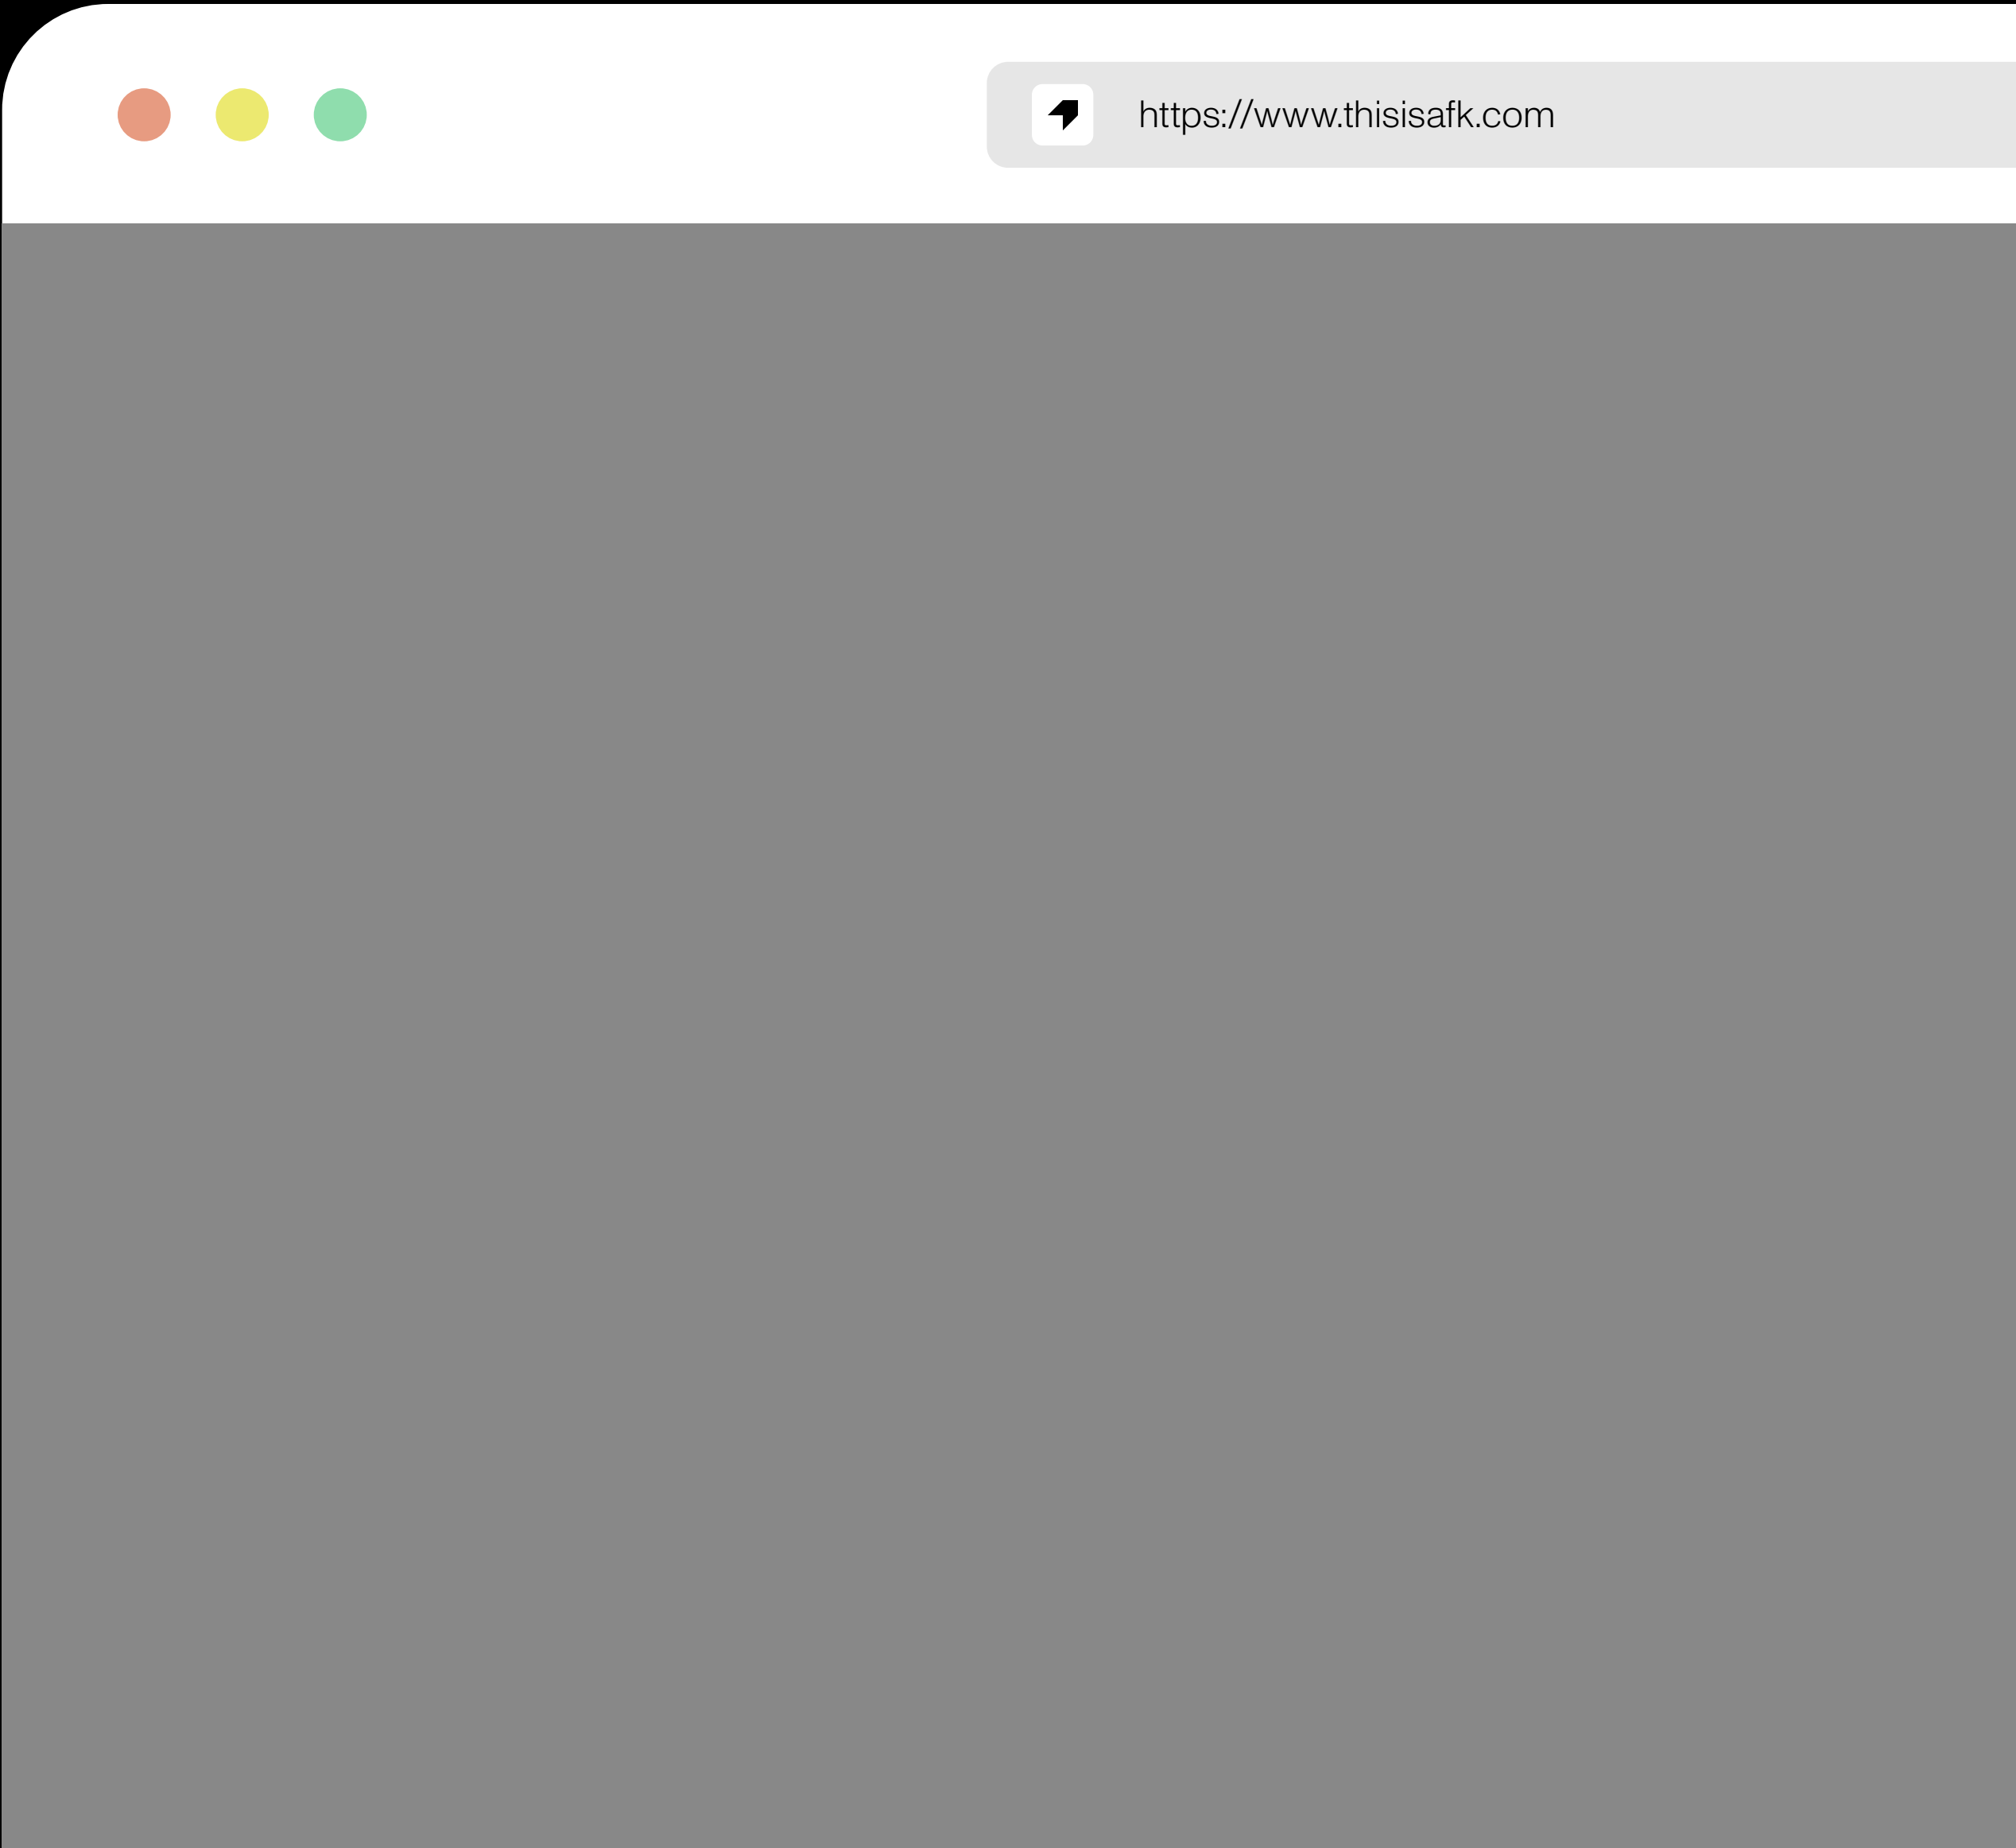

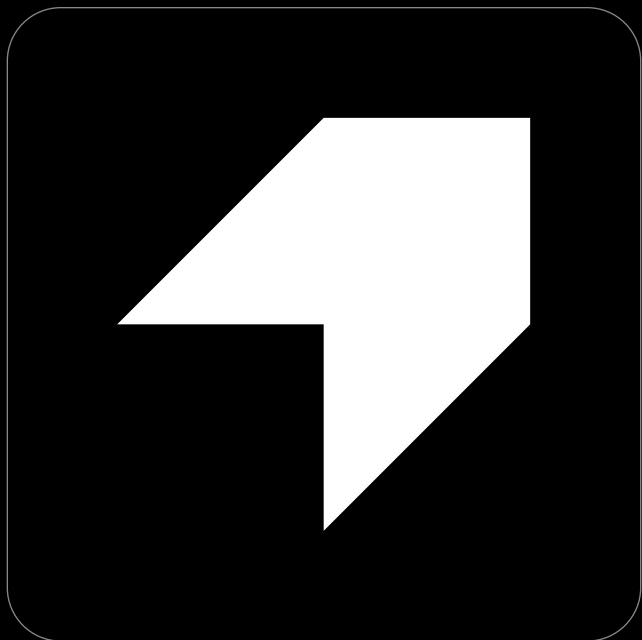

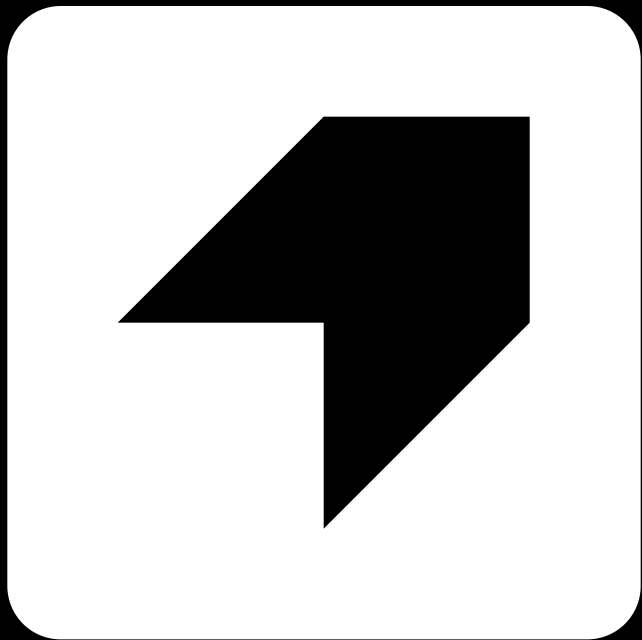

Do not crop the logo

Favicon

The AFK symbol should be used in any instances where the logo isn't legible, ie the favicon. It's able to be used with both white and black backgrounds, with the inverted symbol.

Colour

Primary Palette

The AFK colour palette is made up of black, white, grey, 5 key colours and a calming mesh gradient. These have been carefully crafted to represent the outer glow from neon lights, often found in digital creators workspaces.

In any layout or collateral designs, black is the preferred background colour with white text and full colour imagery. The occasional use of white backgrounds is able to be used to add interest or differentiation where needed.

Secondary Palette

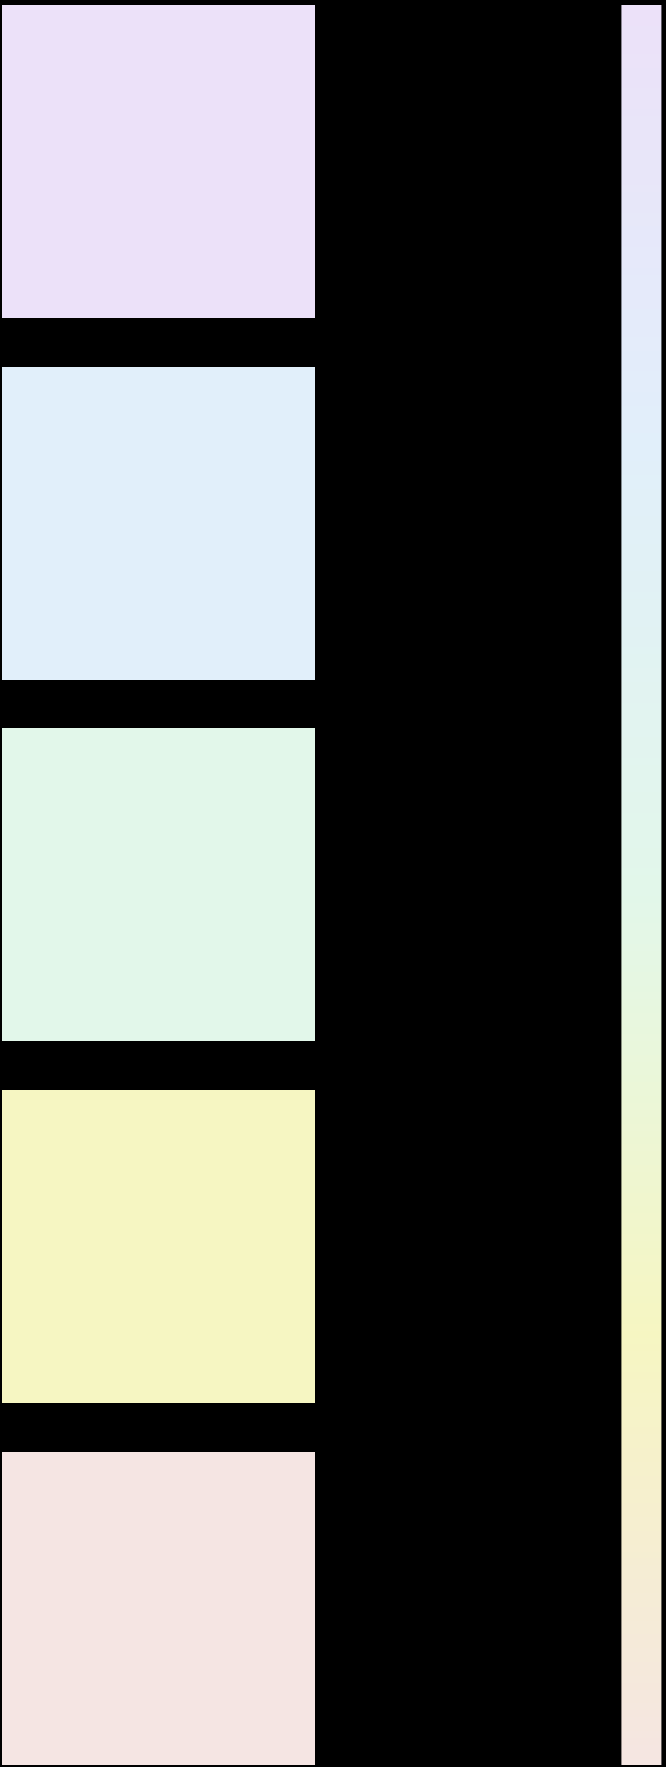

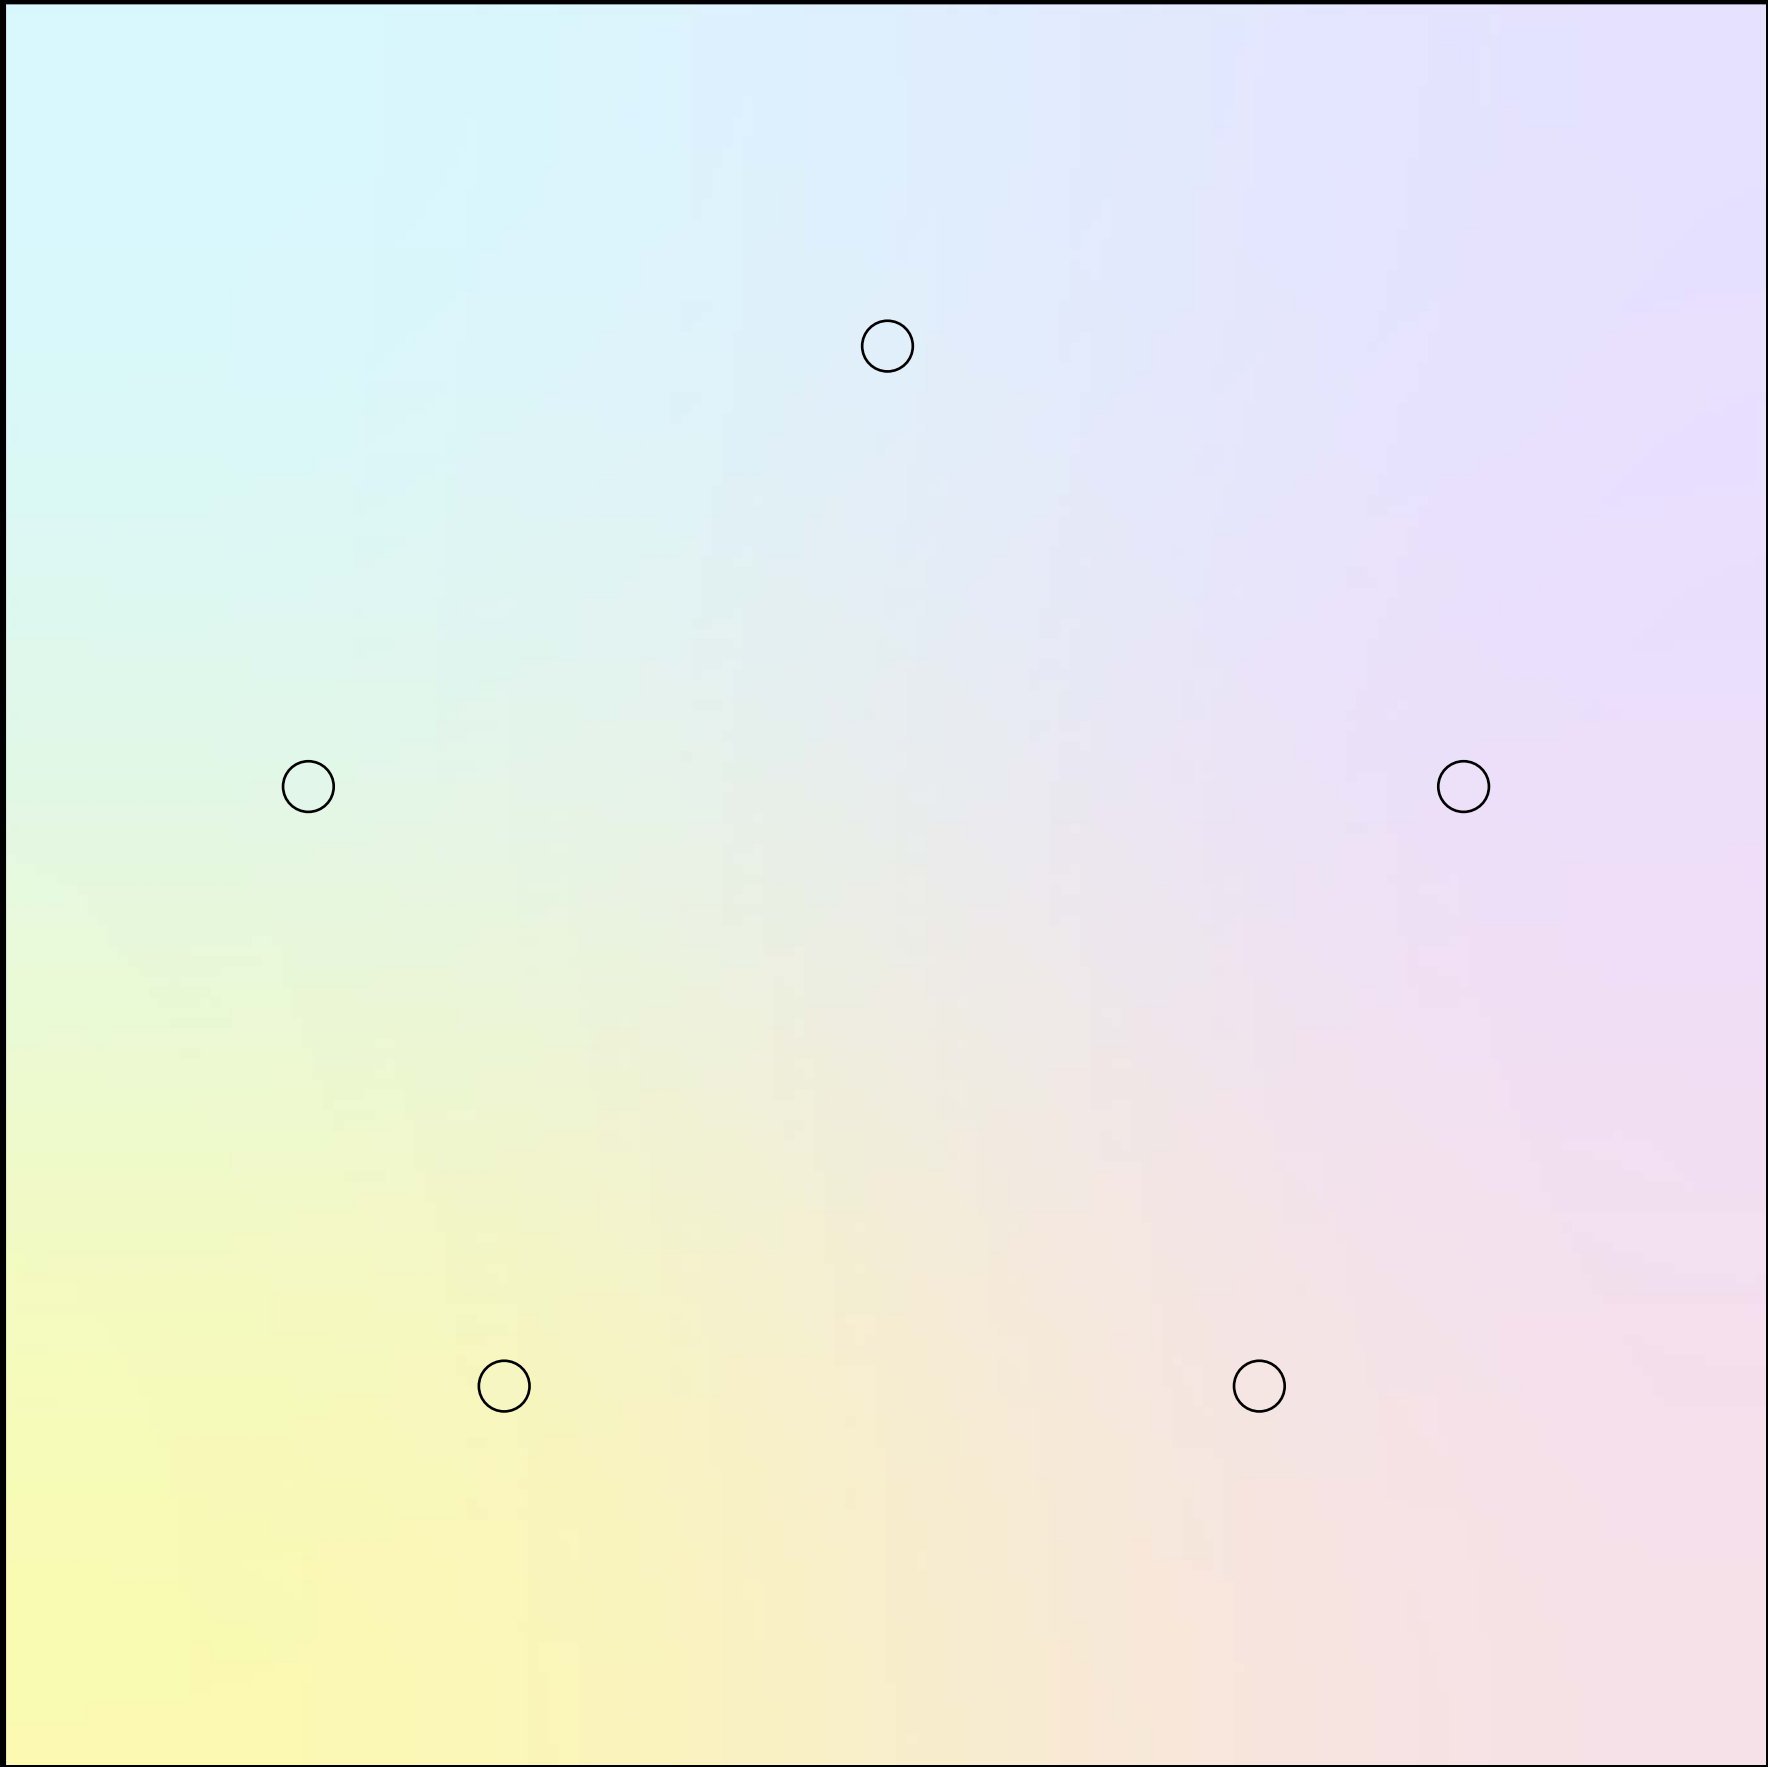

The secondary palette forms the AFK gradient, however these lighter tints should only be used in instances where the primary colours cannot be used or where more variety is required, ie graphs, charts.

Our Gradient

The AFK mesh gradient is made up of AFK's secondary palette, the 5 lighter colours. This should be placed as a whole assets where required, not recreated.

A linear gradient is also able to be used within strokes, data charts & graphs where the mesh gradient isn't possible. This should always be in the order of; purple, blue, green, yellow and orange.

Type

AFK Monument Grotesk is a distinctively confident font, with strong ties to Swiss design its honest, unrefined shapes, high vertical contrast and squared points make it perfect for contemporary use across the AFK brand. Light and Regular weights are able to be used.

Always typeset all text with optical kerning and aligned left where possible.

Format

Our Shapes

In order to create the shape shadow to be used across various brand assets, the symbol should be exactly 50% of the shortest side length of the shape. For example, if the image is 300px high, the symbol & therefore shadow created should be 150px.

The symbol is then turned 180° to form the shadow from the bottom left corner of the shape.

Rotate 180°

Image Use

There are three different ways to display imagery across the AFK brand. Images are able to be housed inside various sized & orientated shapes, either deep-etched from their background, within an entire shape or using the cube shape and appropriate colour.

These three shapes are an example of the different orientations that can be used; square, landscape & portrait. Customs sizes are also able to be created where necessary, see 'our shapes' section on how to build them.

The Grid

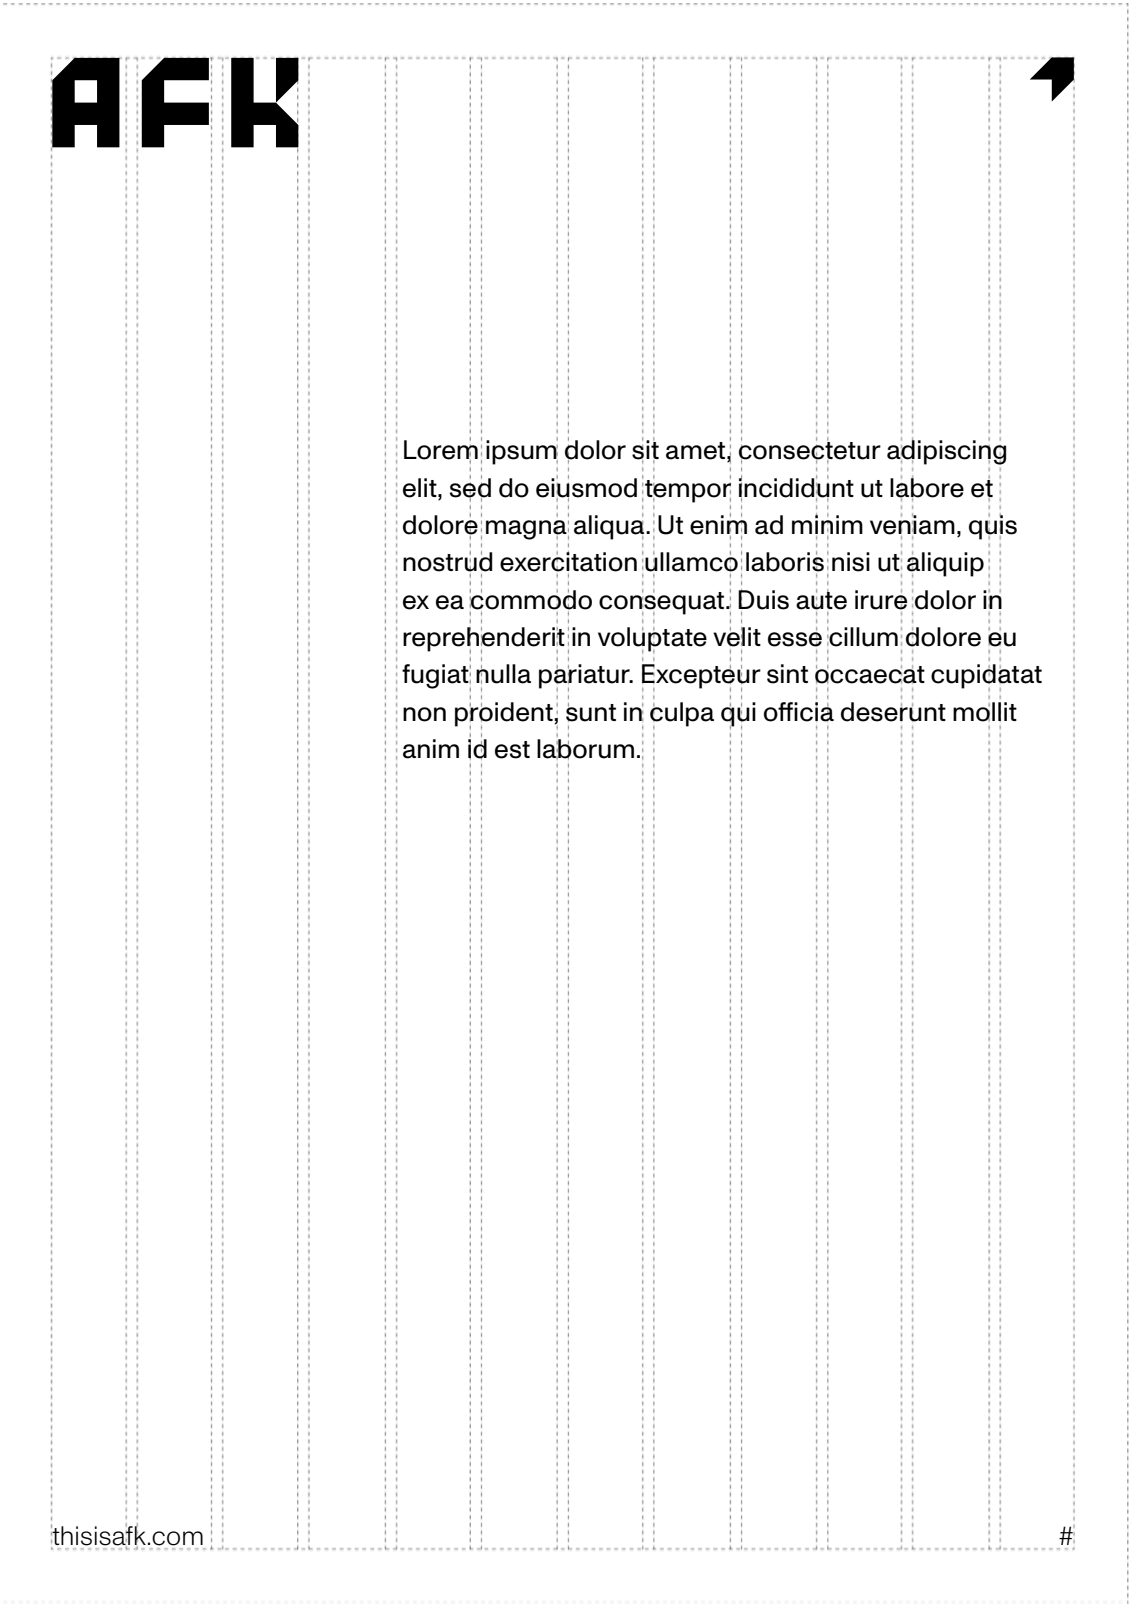

To ensure consistency across all applications of the brand, a 12-column grid system should be followed. This is able to be used in both landscape and portait orientations, allowing text to be placed with flexibility.

See the following page for guidelines on creating a layout.

12 Column Landscape Grid

12 Column Portrait Grid

Creating a Layout

When creating any layout, follow these guidelines to ensure consistency across brand assets. Horizontal lines are able to be used sparingly to break up areas visually or when presenting clout statistics for talent.

The logo and symbol should always be in the top half of a layout, with any smaller text elements aligned to the bottom of the layout where possible.

The logo is aligned to the top right corner where possible & should always be placed within the columns

Headings should be in AFK Monument Grotesk Light and aligned left

Sub text should be in AFK Monument Grotesk Light and aligned to the bottom corner where possible

Symbol is 50% of the logo width & aligned to a corner

A 12-column grid should always be used to align different elements

Any applications relating to AFK as a whole should use imagery combined with the AFK gradient
